COMPONENT LIBRARY

All markers are at true court scale (≈1.7 m on a 40 m court). Copy and paste directly onto any diagram — they will be proportionally correct.

PLAYER MARKERS (plain)

A

ZONES / SCREENS

Zone

Screen

BODY SHAPE — shoulder-line pucks

A

Attacker

D

Defender

G

GK

N

Neutral

Flat edge = shoulders, curve = chest. One shape — rotate it to show open / closed body shape.

VISION CONE — facing + field of view

A

Attacker

D

Defender

G

GK

Rotate the group: cone shows where the player faces and what they see. On a defender it doubles as a cover shadow.

LONG VISION CONES (≈8 m, standalone)

Attacker

Defender

GK

ROTATION

· All orientation markers face UP by default. Select → drag the rotation handle, or Format Shape → Rotation and type the angle (0 = up, 90 = right, 180 = down, 270 = left).

LONG CONES (right) are separate — no player attached. Drop one under any marker, rotate to aim, drag a corner handle to lengthen.

SCANNING AWARENESS ZONE (180°, ≈5.5 m at court scale)

Attacker

Defender

GK

Combined

SCANNING AWARENESS · VISION CONE · BODY SHAPE

Scan zone (180°, dashed, very light) = the full area a player actively sweeps before receiving — peripheral awareness, not just facing direction.

Vision cone (70°, solid) = immediate focus and field of view. Scan zone + vision cone together show the difference between what a player checks and what they commit to.

COMBINED example (left): all three layers in one group. Rotate the whole group to orient the player. Use standalone or combined — each is a separate object.

TEAM A your team

1

2

3

4

5

TEAM B opposition — change fill colour to match

1

2

3

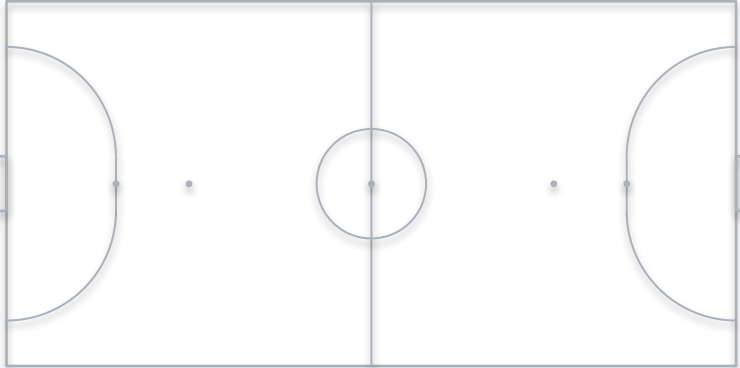

4

5

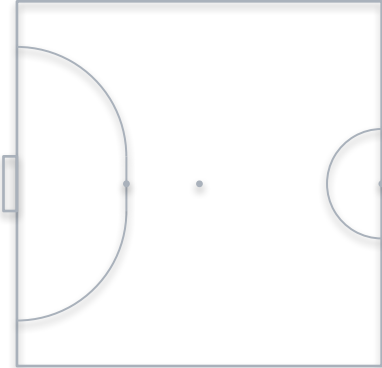

SCALE + COLOUR

Markers are at true court scale. Team pucks carry body shape: rotate any puck to angle the shoulders. To recolour Team B: select all 5 → Format Shape → Fill.

FULL COURT (40m × 20m)

HALF COURT (20m × 20m)

USAGE

Courts are grouped — one click selects the whole court. Copy and paste into any diagram zone, resize to fit. Ungroup (Ctrl+Shift+G) to edit individual markings.

All shapes are unlocked. Numbers inside markers are editable — double-click to change. To recolour: select shapes → Format Shape → Fill.

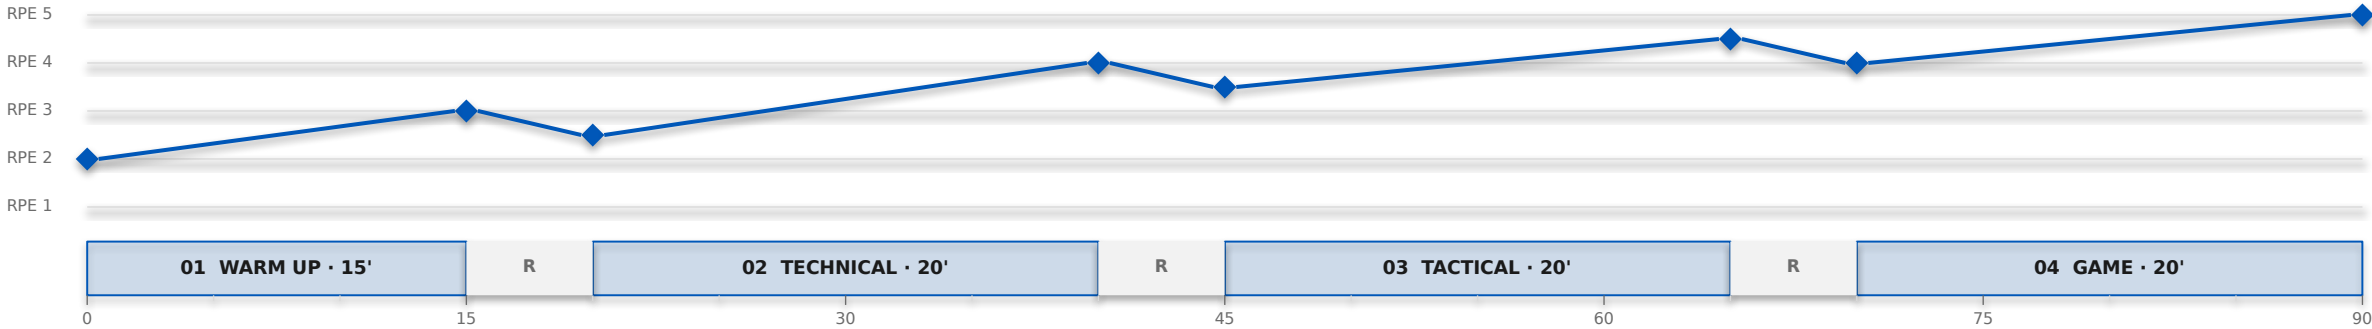

COMPONENT LIBRARY — court-scale tactical symbols · scan zone (180°, 5.5 m) · vision cone (70°, 3 m) · long cone (8 m, standalone) · body puck · rotate to orient · combined group available

SESSION CONTROL BOARD

The session as an instrument, not a document — time, load, tactical balance, rotations and the review loop on one surface. Plan it here, audit it here, seed next week here.

TEMPO + LOAD TIMELINE (width = time)

Bars are minutes — drag a bar edge to your real timings. Diamonds = planned intensity: drag one and the curve stays attached. After the session, copy the diamonds, recolour grey, set actual — instant planned vs actual.

GAME-MOMENT FINGERPRINT

Where does this session actually live? Fill before you coach.

ON-COURT CARDS

Print this slide, cut along the dashed lines: four pocket cards, one per block, in session order. Three cues maximum per card — if it needs more words, it belongs on the plan, not on court.
